

## HAY 1: 250 000 map sheet area

Benson, J.S., Ashby, E.M. & Porteners, M.F. (1997)

The native grasslands of the Riverine Plain, NSW

*Cunninghamia* 5(1): 1–48

Six plant communities were selected, with 224 species being listed.

Botanical Region: SWP

LGAs: Murrumbidgee, Leeton, Narrandera, Lockhart, Urana, Jerilderie, Conargo, Berrigan, Corowa

Mulham, W.E. & Jones, D.E. (1981)

Vascular plants of the Riverine Plain of NSW – Supplementary List

*Telopea* 2: 197–213

A list of 200 plant collections, the genera arranged alphabetically within systematically arranged families. Collection notes include common names, detailed locality, distribution, abundance and value to stock. Exotic species indicated. Supplements the list of Leigh & Mulham (1977) *Telopea* 1: 225–293.

Botanical Region: SWS

LGAs: Wentworth, Balranald, Hay, Windouran, Wakool, Murray

Rupp, H.M.R. (1895)

A catalogue of indigenous plants from Hay district, Murrumbidgee River, (Riverina) NSW

Royal Botanic Gardens Lib. (unpub.)

Species listed under families, with habitat notes, and observations notes on some of the species.

Botanical Region: WP

LGA: Hay

Semple, W.S. & Eldridge, D.J. (1989)

The physical and vegetation resources of the aeolian landscapes of far south-western NSW

Soil Conservation Service of NSW

Lists 220 species in two broad landscape types – the relatively treeless Riverine Plain and ‘the Mallee’.

Botanical Regions: SWP, SFWP

LGAs: Wentworth, Balranald, Carathool, Hay, Wakool, Conargo, Murrumbidgee, Jerilderie, Murray, Berrigan

Stafford, M.J. & Eldridge, D.J. (2000)

Vegetation, soils and management of ‘Zara’: a sandhill remnant on the Riverine Plain

*Cunninghamia* 6(3): 717–746

A total of 77 species are listed, the vegetation being dominated by species from the families Chenopodiaceae and Poaceae.

Botanical Region: SWP

LGAs: Conargo, Murray, Wakool

Turner, F. (1904)

The botany of south-western NSW

*Proc. Linn. Soc. NSW* 29: 132–181

Notes on the flora, etc., and unannotated floristic list.

Botanical Regions SWP, SFWP:

LGAs: Wentworth, Balranald, Carathool, Bland, Hay, Murrumbidgee, Wakool, Conargo, Murray, Jerilderie, Berrigan, Griffith, Leeton, Narrandera, Urana, Corowa, Greater Hume, Lockhart

Williams, O.B. (1955)

Studies in the ecology of the Riverina plain I. The gilgai microrelief and associated flora

*Austral. J. Bot.* 3: 99–112

Species listed under growth habit.

Botanical Region: SWP

LGAs: Hay, Balranald, Wakool
