

Dyeing Eggs!

Create coloured eggs with natural plant dyes

You'll need:

eggs
scissors
rubber bands
olive oil

leaves or flowers
saucepan + ladle
stocking material

Red dye
water
skins of 3
brown onions

Blue dye
water
red cabbage leaves
2-3 tbsp vinegar

1 Hold a square of stocking in your hand and lay a leaf or flower on it. Place an egg on top and wrap up the egg carefully!

2 Carefully pull the corners of the stocking so it holds the leaf or flower against the egg. Pull and twist it tight and secure with a rubber band.

3 Put the eggs in a saucepan with the dye ingredients and heat up. Let them simmer for about 20 minutes. For blue eggs, turn off the stove and let them soak overnight.

4 Turn off the stove and carefully take out your eggs. Unwrap to see them transformed! Rub them with olive oil to make them shiny.

Enjoy your beautiful
hand-made eggs!
